Deconstructing Infrastructure Projects - Innovative Trends in Construction Disputes

In the construction industry, disputes are an all too common and costly occurrence. Increasingly it has been recognised that a clear dispute avoidance strategy implemented throughout the whole project life from procurement to completion will assist the parties in recognising and minimising situations where potential disputes arise. Join our panel of experts as we look at some of the common causes of construction disputes, ways to mitigate such risks and to examine some of the latest innovative trends on managing experts, lawyers and the tribunal to obtain the most cost-effective result.

Topics include

- Making strategic choices in the Construction Industry
- Innovative Trends in Arbitrating Construction Disputes – Vietnam and East Asia Perspective
